

Safe cylinder database

Local manufacturers or importers of LPG cylinders must obtain a Cylinder Verification Permit prior to importation of cylinders.

To find out if your cylinder is verified, please consult the database [here](#).

Safe appliance database

In terms of the Pressure Equipment Regulations, it is mandatory for importers of appliances, hoses and regulators to obtain a Verification Permit from LPGSA if they intend on selling the product in South Africa.

To find out if your appliance is safe, please consult the database [here](#).

LPG dealers

Approved dealers can be located through the customer-care channels of LPG distributors, which are accessible via the links below. Make sure you always use a legitimate dealer who has permission to supply gas cylinders from the brand owners.
